AGENDA

GDP in Poland 2004-2020 Impact of COVID pandemic

1. What is GDP?
2. How to calculate annual GDP?
3. How Poland's GDP changed during 2004-2020?
 - 3.1. Nominal value in PLN and USD.
 - 3.2. Change in PLN.
 - 3.3. Change in USD.
4. How to calculate average growth of GDP?
5. Is GDP the best indicator?
6. Any prediction of Poland's GDP in 2021?

1. What is GDP?

ABBREVIATION

- GDP = Gross Domestic Product

DEFINITION

- GDP is the total value of all the finished goods and services produced within a country's borders

The World Economy Gross Domestic Product (GDP) by Country 2019

Article & Sources:

<https://howmuch.net/articles/the-world-economy-2019>
<https://databank.worldbank.org>

2. How to calculate GDP?

$$\text{GDP} = C + I + G + \Delta E$$

3.1. Poland's GDP during 2004-2020 [nominal value]

Poland's GDP

in bln USD in bln PLN

[in %]

Poland's GDP

$$GDP_{n+1} = \frac{GDP_{n+1} - GDP_n}{GDP_n} * 100\%$$

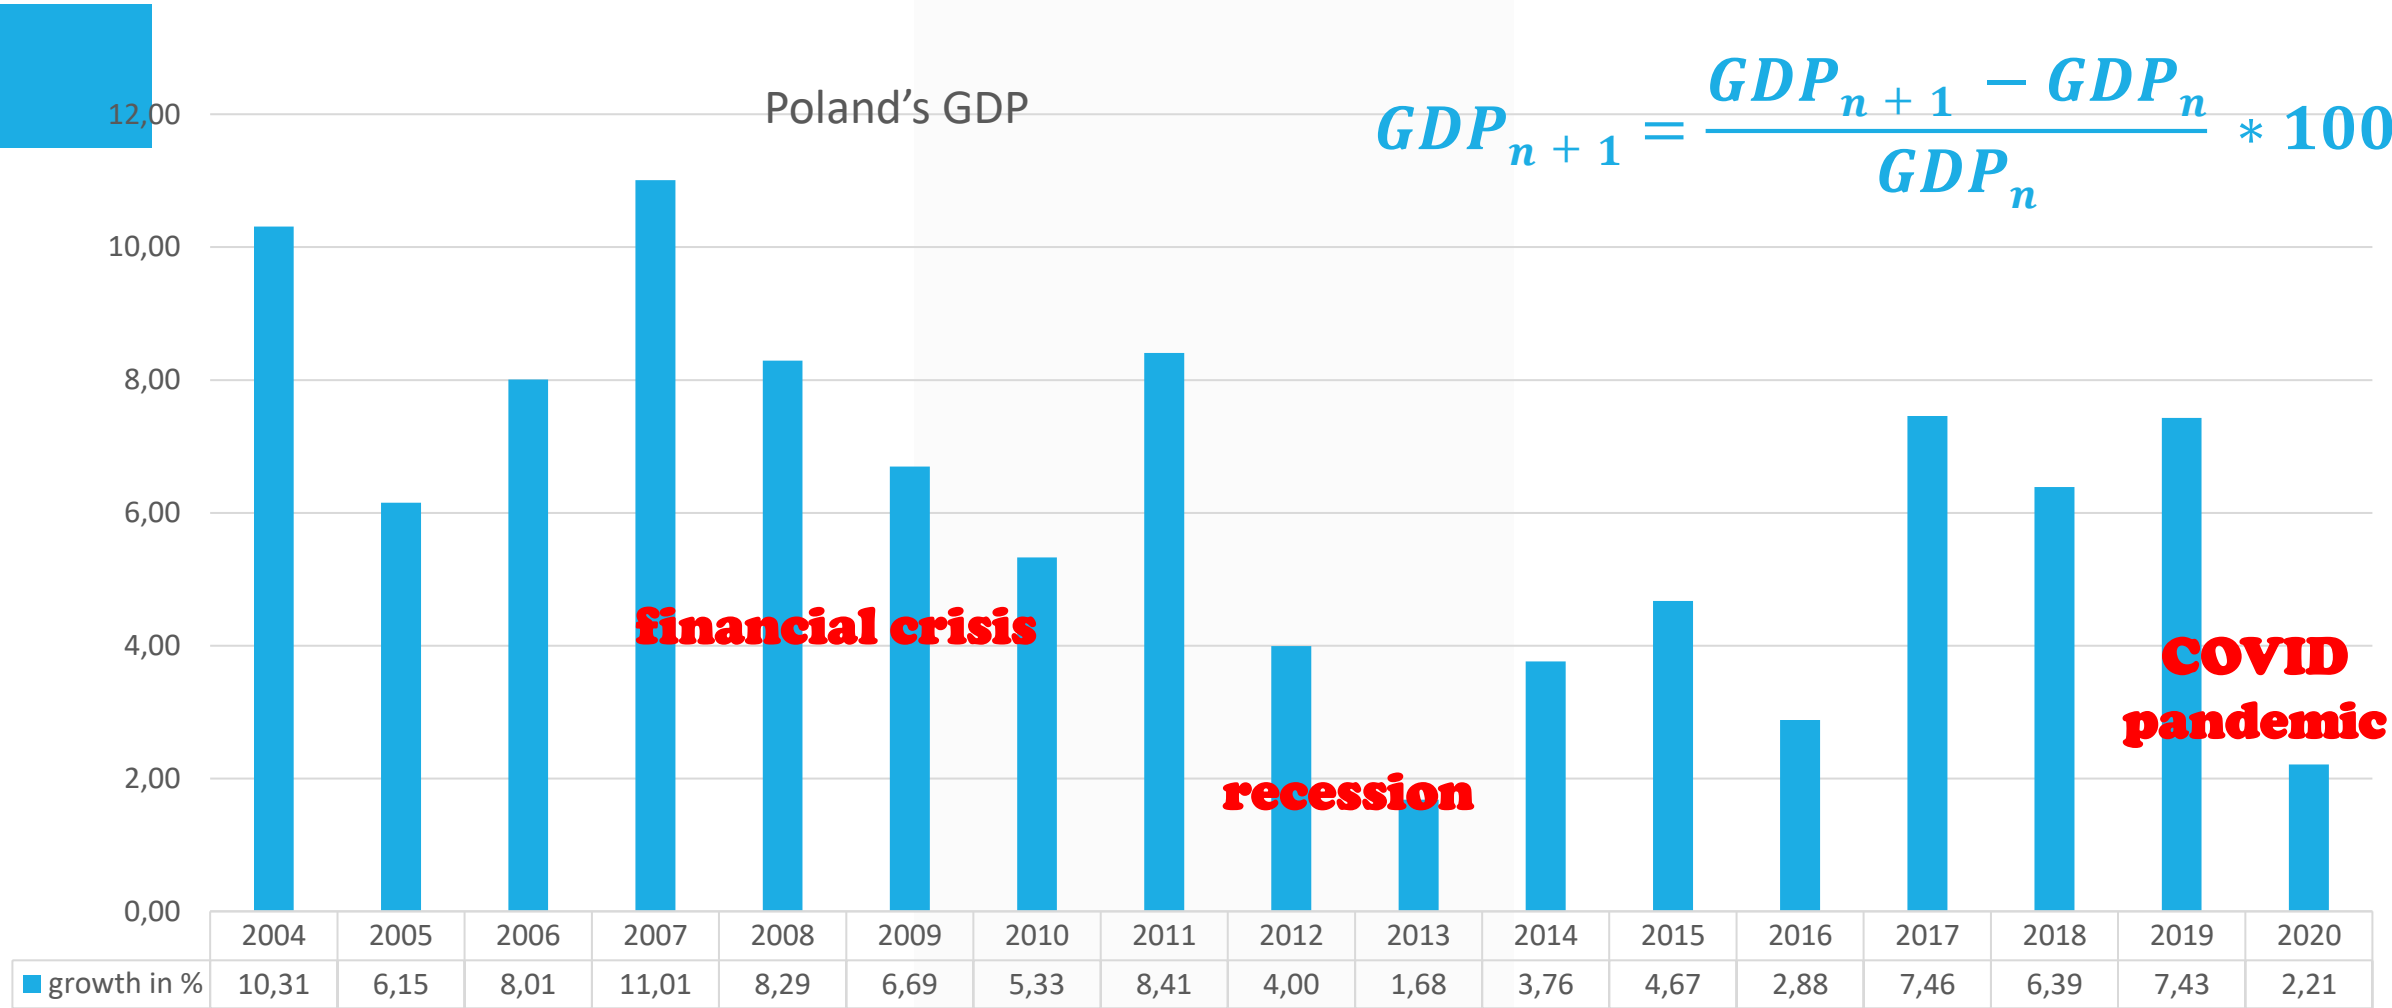

■ growth in %

[in %]

Poland's GDP

$$GDP_{n+1} = \frac{GDP_{n+1} - GDP_n}{GDP_n} * 100\%$$

■ growth in %

[in %]

Poland's GDP

$$GDP_{n+1} = \frac{GDP_{n+1} - GDP_n}{GDP_n} * 100\%$$

	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
■ growth in %	17,13	19,99	12,58	24,49	24,38	-17,60	9,12	10,11	-5,64	4,51	4,13	-11,93	-1,09	11,40	11,57	1,45	-0,29

■ growth in %

3.3. Poland's GDP (growth in USD) change [in %]

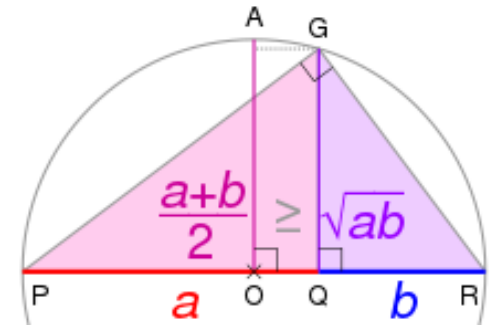

$$GDP_{n+1} = \frac{GDP_{n+1} - GDP_n}{GDP_n} * 100\%$$

4. How to calculate average growth of GDP?

DEFINITION OF GEOMETRIC MEAN

- A mean or average, which indicates the central tendency or typical value of a set of numbers by using the product of their values (as opposed to the arithmetic mean which uses their sum).

WHAT DOES IT MEAN?

- $GDP_{avg} = \sqrt[n]{GDP_1 * \dots * GDP_n}$

HOW TO COUNT IT FOR 2004-2020?

- $GDP_{avg\ 2004-2020} = \sqrt[17]{1.1031 * 1.0615 * 1.0801 * \dots * 1.0639 * 1.0743 * 1,0221} = .1,0613$
- $GDP_{avg\ 2004-2008} = \sqrt[5]{1.1031 * 1.0615 * 1.0801 * 1.1101 * 1.0829} = \sqrt[5]{1.52037} = 1.0874$
- $GDP_{avg\ 2019-2020} = \sqrt{1.0743 * 1.0221} = \sqrt[5]{1.098042} = \dots 1,0478$

5. Is GDP the best indicator?

GDP_{NOMINAL} VS GDP_{REAL}

Real GDP is nominal GDP, adjusted for inflation

GDP PER CAPITA

- Gross Domestic Product (GDP) per capita shows a country's GDP divided by its total population
- $\text{GDP per capita} = \frac{\text{country's GDP}}{\text{total population}}$
- $\text{GDP}_{\text{PL 2020}} = 594,2 \text{ bln USD}$
- Population of Poland in 2020 = 37,950,000
- $\text{GDP PL per capita} = \frac{594,200,000,000 \text{ USD}}{37,950,000} = 15,660 \text{ USD}$

6. Any prediction of Poland GDP in 2021?

IMPACT OF COVID PANDEMIC

Lockdowns, broken supply chains, lower production

IMPACT OF ANTI-CRISIS SHIELD

- Government's help for companies

WHAT IS THE OUTCOME?

- Any predictions for 2021?

Thank you for yours attention!
