La vie est belle

the balm has moisturising, softening, and protective properties for the skin.

Also, In this balm, chemical composition contains many ingredients that give it a pleasant fragrance, but they are harmful to the skin.

Le Petit Marseillais body balm

characteric of this balm is its excellent moisturizing and soothing properties, but in the chemical composition compound a parfum, which is harmful ingridnet for the skin.

Isana body balm white blossom

characteristic of this balm is its many functional formula. Balm have a lot of ingredients, that they acts as an emollient, emulsifier, and surfactant, ensuring a smooth texture and easy application. Like other balm, this also have a harmful ingredients like parfum and alpha-isopropy.

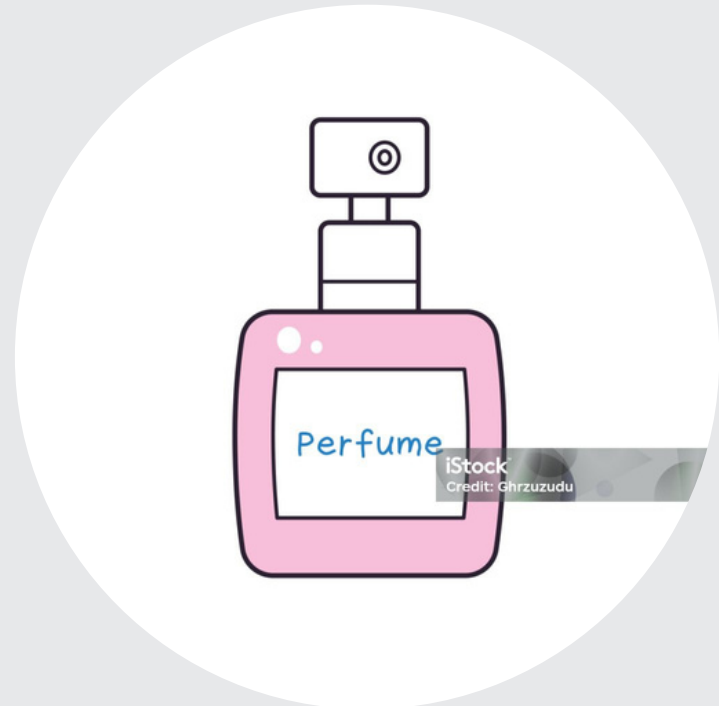

the same ingredients in three balms.

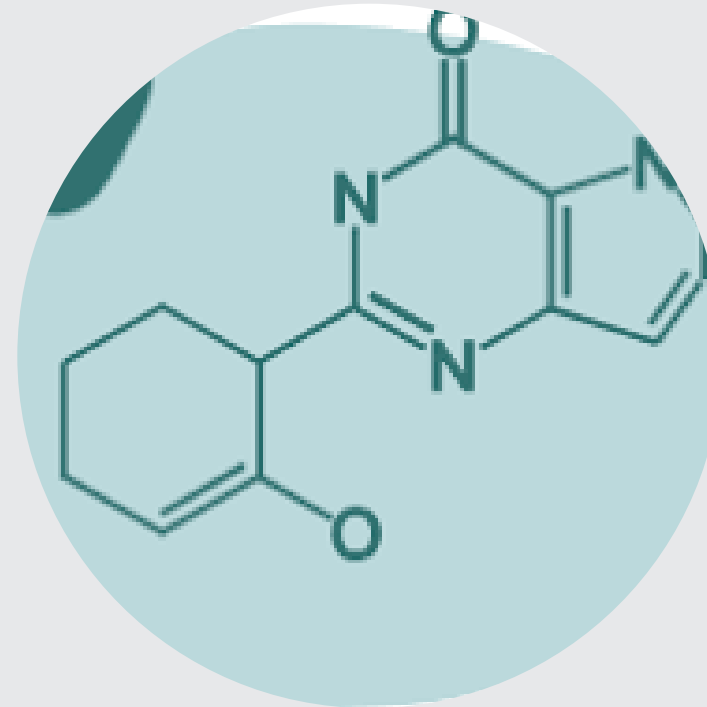

I compared three balms, and I found that they have the same ingredients...

water

parfum

carbomer

sodium hydroxide

glycerin

citric acid

Harmful ingredients

harmful ingredients for skin, in this three balms.

farnesol, limoene, citronellol,
parfum, linalool, geraniol,
benzoic acid.

parfum

parfum, alpha-isopropyl

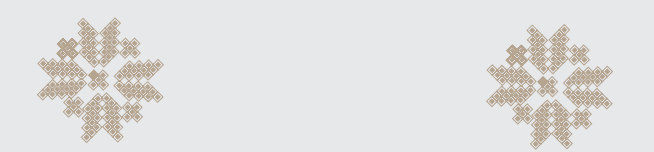

Handmade balm

I created a balm safe for the skin, with available ingredients for everyone.

recipe:

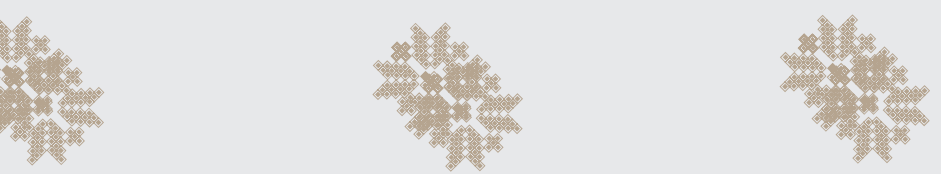

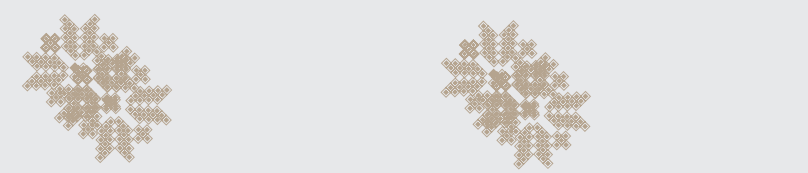

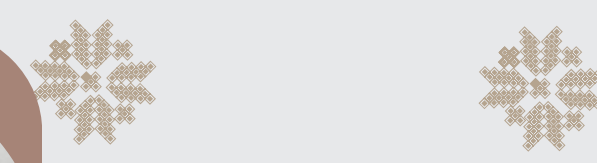

- 10 ml of water
- teaspoon of instant coffee
- 35 ml of aloe gel
- tea spoon of sunflower oil
- 2 drops of vanilla essence

Conclusion, we can drawn

through my research

**Thank You
for paying
attention.**
